Errors in Python

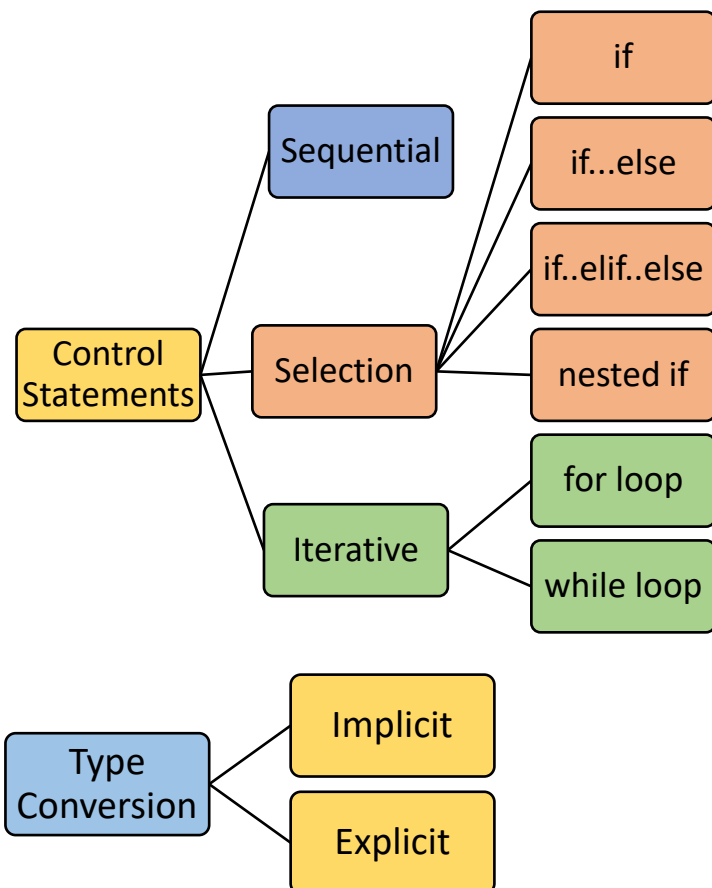

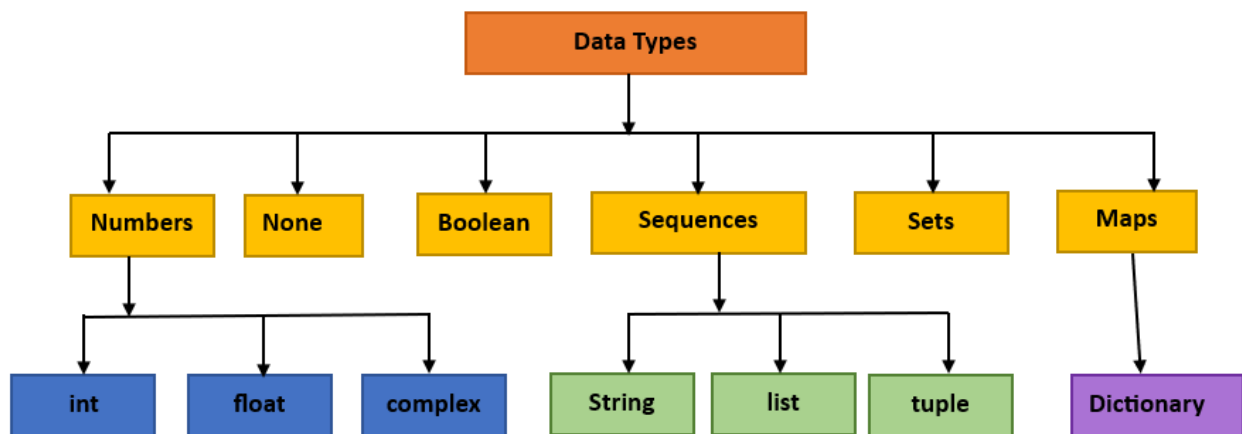

Operators in Python

Flowchart

SYMBOL NAMES	SYMBOLS	PURPOSE
Oval		Used to start and stop a flowchart.
Parallelogram		Used to take input and display output.
Rectangle		Used to perform assignment, mathematical and processing operations.
Diamond		Used for decision-making in case of branching or looping.
Arrow in any direction		Used to show the direction of flow of information in a flowchart.

Operator Precedence	
order of precedence	Operators
1	()
2	**
3	*/%//
4	+ -
5	<= < > >=
6	== !=
7	= %= /= //=-= += *= **=
8	not, and, or
